

Oil Field Environmental Incident Summary

Incident: 20140613152416 **Date/Time of Notice:** 06/13/2014 15:24

Responsible Party: STATOIL OIL & GAS LP

Well Operator: STATOIL OIL & GAS LP

Well Name: WRIGHT 4-33 5H

Field Name: ALGER

Well File #: 23859

Date Incident: 6/13/2014 **Time Incident:** 06:15

Facility ID Number:

County: MOUNTRAIL

Twp: 155

Rng: 93

Sec: 4

Qtr:

Location Description: Approximately 20 to 30 barrels released into the ditch line of the road way of county road 59.

Submitted By: Jeremy Mohl

Received By:

Contact Person: Jeremy Mohl
6300 BRIDGE POINT PKY, BLDG 2
SUITE 500
AUSTIN, TX 78730

General Land Use: Well/Facility Site

Affected Medium: Topsoil

Distance Nearest Occupied Building: 1.5 Mile

Distance Nearest Water Well: 1 Mile

Type of Incident: Tank Overflow

Release Contained in Dike: No

Reported to NRC: No

Updated Other Contaminant

Notes:

Spoke with company contact at 16:03 6/13/14.

According to the company contact, the spill occurred as a result of mechanical failure due to human error. Two-hundred and fifty-eight barrels were lost; of those, only 30 barrels escaped the location. The responsible party has hired a contractor and has begun to remediate the site. No water was impacted; there are currently dikes built around the impact site to prevent surface runoff due to rains.

Mountrail Emergency Management has been at the location.

More followup is necessary.

Notes:

Arrived on location at 15:00, 6/16/14. 72 degrees F, partly cloudy, east wind 15-20 mph. Observed site and took photos. Met with cleanup contractor who escorted me around the site and explained the remediation schedule. At the time of inspection, all of the impacted soils had been removed and transported to Prairie Disposal. Soil samples had been collected for lab analysis and will be forwarded to the NDDoH when the cleanup and report are completed. According to the representative, the impacts off the well pad had been removed shortly after the release. The release began near the crude oil/saltwater tanks and moved toward the southwest corner of the wellpad and exited through a drainage pipe toward the south and west along the road ditch for approximately 300 feet. Excavations along the path in the ditch were approximately 10 feet in width. According to the on-site representative, a spill cleanup report will be forwarded to the NDDoH for confirmation of cleanup. Follow up with report confirmation.
